

21ST CENTURY SCHOOL
Workshop Series
BY 21CLI & 407 LEARNING

Data Protection Best Practice in Google Admin

WHEN

Wednesday 9 June 2021
15:00 to 17:00 (HK Time / GMT +8)

PRICE

\$199USD + 4% registration fee
For two places

This workshop is designed specifically for schools. Learn how to tune a Gsuite/workspace admin console according to international data protection best practice, GDPR & PDPA regulations. Participants will also learn about tuning Google Suite for maximum success and maximal protection. The design of this workshop is predicated on the idea that data protection decisions should be made by a team of which IT is a part.

Data protection is a mission critical area of school operation but one which is often ignored by Leadership Teams and left by default to the IT Department. Leadership Teams expose themselves and the organisation to unacceptable risks if they ignore this area of operation planning. Leave the workshop with insights into how to make your Workspace Admin secure, compliant and optimised for learning.

This workshop is part of a series on 21st Century Schools.

WORKSHOP FACILITATORS

407 Learning:
Ben Thompson
Ben Sheridan
Google Experts from C-Learning

All registrations are entitled to a free 30 minute followup consultation with 407 Learning and C-Learning to further explore their specific needs and concerns.
